## FP125 Family Practice Update

**Price:** \$580.00

**Register:** (866) 611-5599 or [www.AmericanSeminar.com](http://www.AmericanSeminar.com)

*\*Special Association accreditation may vary. See website.*

### **Sports Injuries/Olfactory Dysfunction - Eric Anish, MD and Nicholas R. Rowan, MD**

Recognize the signs and perform appropriate examinations to diagnose shoulder impingement, femoroacetabular impingement (FAI) syndrome, and patellofemoral pain syndrome; Distinguish morphologic FAI from FAI syndrome; Elaborate on the importance of physical therapy and conservative care for management of shoulder impingement, FAI syndrome, and patellofemoral pain syndrome; Review the clinical presentation, incidence, and importance of olfactory loss as a symptom of COVID-19; Recommend appropriate treatment strategies for olfactory loss associated with COVID-19.

FP 69 - 34

### **Nonopioid Pain Relievers/Sore Throat - Cynthia Cheng, MD**

Counsel patients about the efficacy of acetaminophen and a range of nonsteroidal anti-inflammatory drugs; Compare the side effects of various nonsteroidal antiinflammatory drugs; Evaluate the use of antidepressants for pain management; Consider the differential diagnosis of sore throat; Diagnose common complications of tonsillitis.

FP 69 - 36

### **Liver Disease and Injury - Deborah Kahal, MD and Peter S. Buch, MD**

Monitor disease progression in hepatitis B and C using serologic markers; Recommend lifestyle modifications and treatments to prevent transmission and progression of hepatitis B and C; Interpret screening results to determine appropriate treatment strategies for hepatitis B and C; Distinguish among phenotypes of drug-induced liver injury; Identify risk factors for drug-induced liver injury

FP 69 - 38

### **Neuropathy/Olecranon Bursitis - Noah A. Kolb and Jennifer M. Wolf, MD**

Evaluate for signs and symptoms of various types of neuropathy; Recommend appropriate therapeutic strategies for treating neuropathy; Manage symptoms of diabetes-related neuropathy; Differentiate between clinical features and management strategies of septic and aseptic olecranon bursitis; Choose appropriate treatment methods for olecranon bursitis.

FP 69 - 35

### **Heat-related Illness/Epistaxis - Beth Choby, MD**

Explain the basic pathophysiology of thermoregulation; Differentiate between heat exhaustion and heatstroke; Compare exertional heatstroke with classic heatstroke; Select appropriate management strategies for heat-related illnesses; Treat epistaxis in patients with a history of a bleeding disorder or traumatic injury of the nose.

FP 69 - 37

### **Recurrent Urinary Tract Infections/Initial Management of Cancer - Catherine A. Matthews, MD and Sam Brondfield, MD**

Identify risk factors for UTI; Perform a diagnostic workup for initial, recurrent, and complicated UTIs; Select treatment strategies for initial, recurrent, and complicated UTIs; Perform an initial workup for patients presenting with signs of cancer; Develop strategies for referral of patients diagnosed with cancer in the family practice setting

FP 69 - 39

## FP125 Family Practice Update

**Price:** \$580.00

**Register:** (866) 611-5599 or [www.AmericanSeminar.com](http://www.AmericanSeminar.com)

*\*Special Association accreditation may vary. See website.*

**Anorectal Conditions /Anticoagulation  
Management - Jesse S. Moore, MD and Karen  
Libby, BSN**

Distinguish common anorectal conditions from hemorrhoids; Recognize signs and symptoms of anorectal disease; Select appropriate management strategies for treating hemorrhoids and other anorectal conditions; Identify cofactors affecting the international normalized ratio used to monitor patients taking anticoagulants; Choose appropriate testing modalities when assessing patients with bleeding disorders and other conditions.

FP 69 - 40

**Urgent Care: Cases and Clinical Pearls - Jennifer  
Bamford, MD**

Manage tick-borne illnesses such as anaplasmosis in a timely manner; Recommend resources and strategies for preventing constipation to avoid stercoral colitis; Recognize complications associated with long-term bisphosphonate use; Identify patients with Morgellons disease who would benefit from psychological therapy; Apply the latest principles of management of thrombophlebitis.

FP 69 - 42

**Atrial Fibrillation in the Elderly/Updates in  
Women's Health - Mike W. Rich, MD and**

Identify risk factors for atrial fibrillation in the geriatric population; Determine whether anticoagulation or invasive management techniques are contraindicated in a geriatric patient with atrial fibrillation; Develop a plan for managing atrial fibrillation in a geriatric patient; Outline management changes in diseases, such as gonorrhea, hepatitis C, and cervical cancer; Implement management changes in practice based on updated guidelines for maintenance of women's health.

FP 69 - 41

**Migraine/Primary Care News - Jessica Ailani, MD  
and Joel C. Diamant, MD**

Summarize the clinical efficacy and safety of novel therapies for migraine; Develop treatment strategies for migraine based on patient comorbidities, migraine characteristics, and response to prior therapy; Diagnose obstructive sleep apnea (OSA) in patients prior to surgery; Select patients who are most likely to benefit from preventive treatment for breast cancer; Optimize treatment of patients with new-onset atrial fibrillation and hypertension.

FP 69 - 43
